

Scenario Directional Demand on the Mixed-Network Topology

Peak-rate snapshot at t = 1800 s; labels show boundary, ramp-bound, and upstream-freeway demand (veh/h). Ramp-bound demand is placed at D/F rather than on the ramp links.

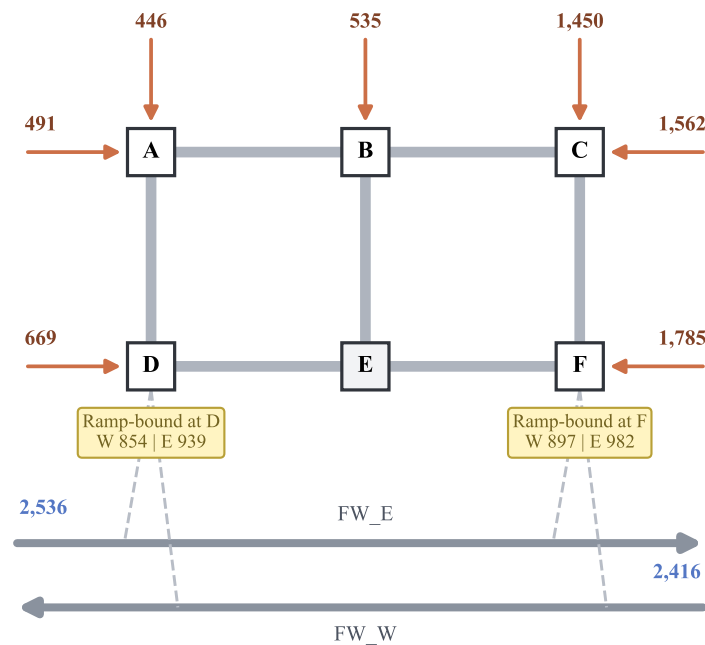

Median

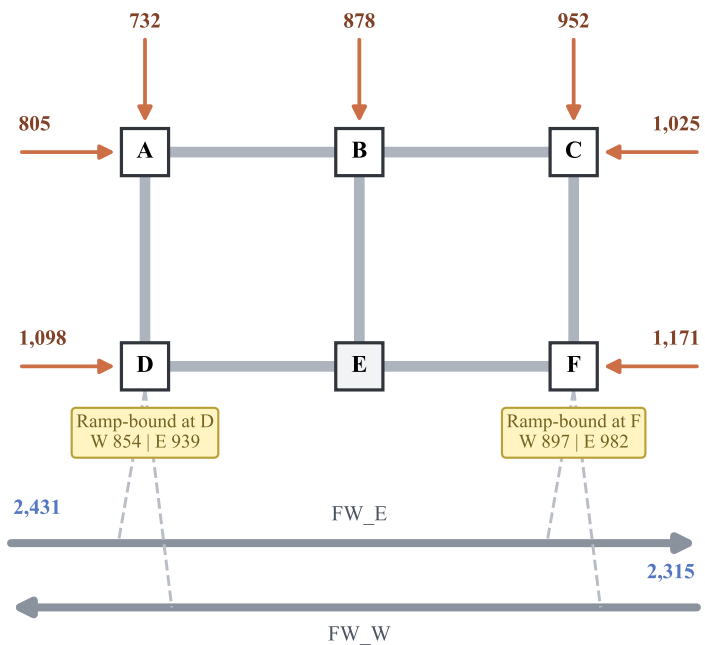

Peak

Peak skew

Incident (capacity factor 0.72)

Orange: urban boundary entry | Gold boxes: ramp-bound demand near D/F | Blue: upstream freeway entry.
